Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102 and 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1,5,10-13 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Motoki et al (6,617,273) for reasons of record.
3. Claims 1-3,5-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kojima et al (6,118,648) further in view of Motoki et al (6,617,273) for reasons of record.

It is agreed that Motoki et al fail to teach collectively calcining the main component, first subcomponent and glass, however the rejected claims are drawn to the product no the process of manufacture. Applicants have not shown by way of tangible evidence that the products of Motoki et al have dielectric losses and/or shrinkage curves different than the instant invention and that the claims reflect those differences. The instantly rejected claims are silent as to any required properties. The examples of the disclosure are not considered representative of the article taught by Motoki et al.

In product-by-process claims, "once a product appearing to be substantially identical is found and a 35 U.S.C. 102/103 rejection [is] made, the burden shifts to the applicant to show an unobvious difference." MPEP 2113. This rejection under 35 U.S.C. 102/103 is proper because the "patentability of a product does not depend on its method of production." *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985).

Applicants' argument that Kojima et al fail to teach collectively calcining (dry synthesis) the main component, subcomponent and glass is not persuasive in overcoming the rejection. Column 6, lines 1-9 and the examples teach mixing all the components and calcining. See specifically column 6, lines 5-7 which recites dry

synthesis. It is agreed that Kojima et al fail to teach a Hf component however the rejection is based upon a combination. Motoki et al teach Hf may be further added.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
